

1) Scheda di lavoro con il reticolo di diffrazione 1000 linee/mm

nome: _____ data: _____

$$\sin \theta = k \frac{\lambda}{d} \quad k = 1, 2, 3, \dots$$

Anche in questo caso d è la distanza tra due fenditure, essendo queste molto vicine tra di loro si preferisce esprimere tale valore in linee per mm o in altre modalità; riporta dunque il valore di d in m

$$\text{Reticolo di diffrazione con 1000 linee/mm } d = \frac{1}{1000 \frac{\text{linee}}{\text{mm}}} = \frac{\text{mm}}{1000 \text{ linee}} = \frac{10^{-3} \text{ m}}{10^3} = \dots\dots\dots$$

Luce laser colore: $\lambda = \dots\dots\dots \text{ nm}$

k=1	$\theta_1 = \sin^{-1} \left(k \frac{\lambda}{d} \right) = \sin^{-1} \left(1 \frac{\dots\dots\dots \cdot 10^{-9} \text{ m}}{\dots\dots\dots \text{ m}} \right) = \sin^{-1} (\dots\dots\dots)$	$\theta_1 =$
